Types of opening

Classic hinged doors with handles are no longer the only option.

Sliding (SMART SOFT)

Soft stop, wooden or aluminium rail, wooden or glass leaf, with or without locking options.

Bi-directional (ERGON)

Conveniently and always opening away from you. Combining a rotating and sliding system in a single mechanism, saving up to 40% of the space typically taken up by open doors.

Wall-folding (COMPACK)

When space is at a premium and every inch counts. COMPACK doors reduce the area needed for opening by up to 50%. Unlike traditional sliding doors, they fold and stack against the wall beside the door opening, avoiding obstruction in the passageway.

Reverse

Opening in the opposite direction, into the frame, saving space in smaller areas. Thanks to their flexibility, they create a uniform look with all doors and walls, regardless of the direction in which they open.

Hinged

A timeless classic. Convenient opening, the widest selection of models, finishes, and materials, sound and smoke sealing, top-tier security.

Folding

Traditional folding doors feature evenly sized slats and, when folded, occupy only one space. Accordion-style folding doors have asymmetrically divided leaves and, when folded, occupy both opening spaces.

Pivoting

Swinging doors. The door leaf, mounted on special hinges, opens in both directions with a simple push and closes automatically. Ideal for high-traffic areas such as restaurants and hospitals.

Sliding (MINIMA)

A minimalist gem. Available in both wooden and glass designs, with single-or double-door options. The system includes a concealed soft-close and damping mechanism.

Interior doors for houses and flats

Choosing the right interior doors takes time. Sit back comfortably – the search for your perfect doors can begin. We've developed 18 original model ranges just for you. With the widest selection of finishes, materials, and opening mechanisms, you can tailor your doors to perfection. At SAPELI, we have inspiration for everyone.

- 18 model ranges
- veneer, laminate, glass, aluminium, premium paints
- hinged, sliding, folding, pivoting, reverse
- handle-free, lock-free, with drop seals

SAPELI | Interior doors

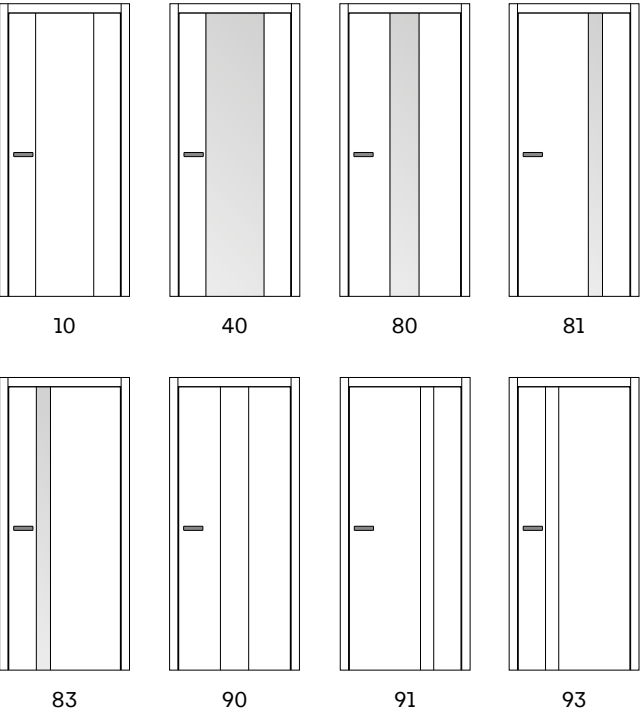

HARMONIE 83 non-rebated door – Beam Oak veneer,
Pure oil, Connex black glass, OBTUS mini frame – Beam Oak veneer,
Pure oil, Maximal handle

HARMONIE

MODELS

Luxurious yet entirely minimalist.
Designed to blend harmoniously into your interior,
whether you choose glass or solid filling, premium
paint, laminate, or natural veneer.

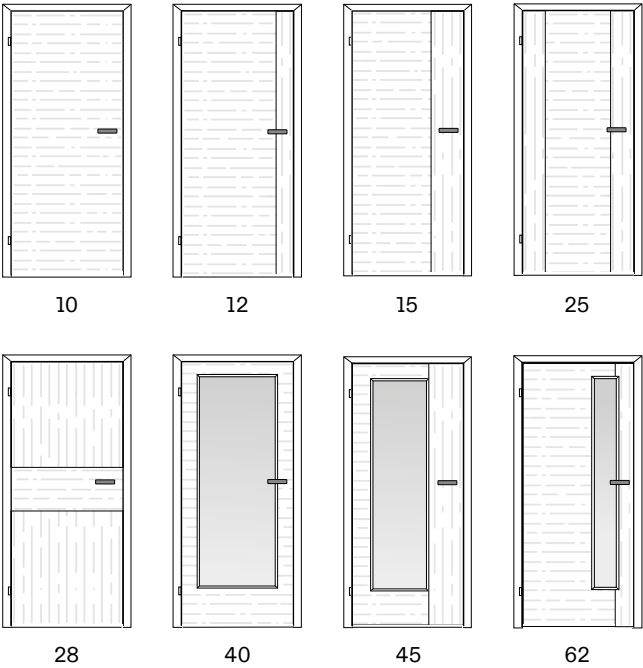

SAPELI | interior doors | HARMONIE

TENGA 15 non-rebated door – Knotted Oak veneer,
NORMAL frame – Knotted Oak veneer, Minimal handle

TENGA®

MODELS

Inspired by natural textures, these doors combine horizontal and vertical grain patterns of veneer. Perfectly complementing minimalist and industrial interiors, they also suit timber-frame homes, as well as traditional spaces.

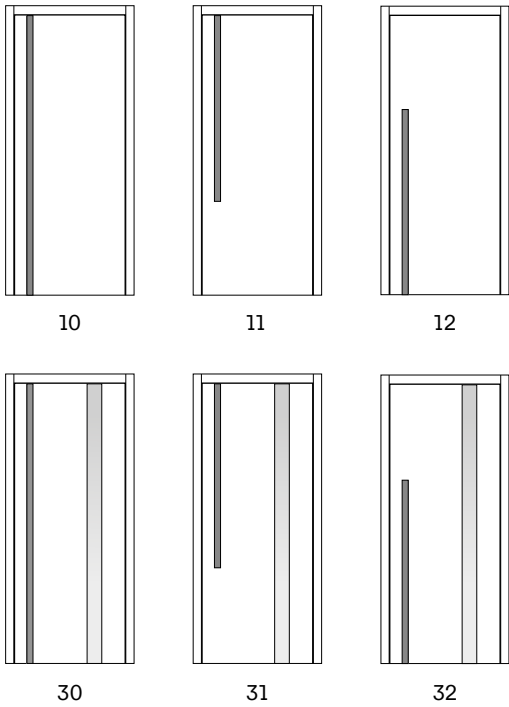

SAPELI | interior doors | TENGA

APPENA 32 non-rebated door – Knotted Oak CPL,
Float Clear glass, INOVIO concealed frame, Due handle

APPENA

MODELS

Strength lies in simplicity. We've brought the revolutionary concept of door opening without a handle to life with the APPENA doors. The bold handle adds a touch of individuality to the interior.

Standard colours for APPENA handles

Optional colours for the handles and edges of APPENA doors

SAPELI | interior doors | APPENA

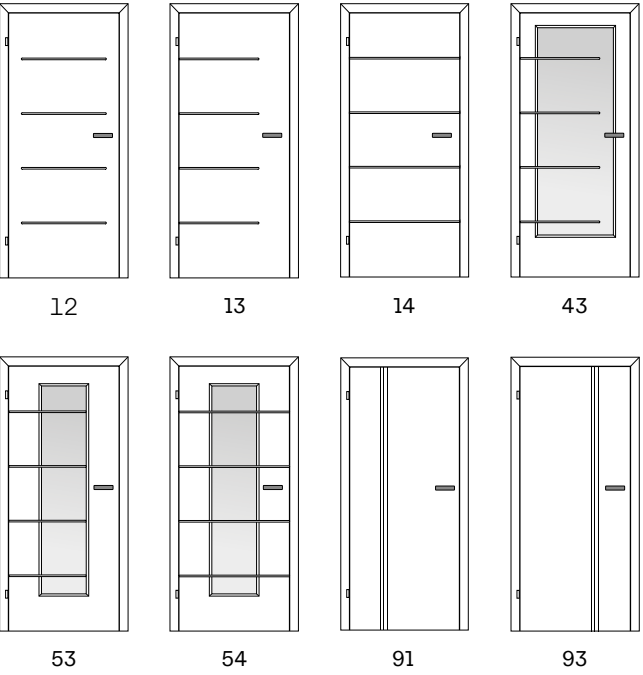

LOTOS 13 sliding door into the wall – Royal Walnut CPL with silver strips,
 mini NORMAL frame – CPL Royal Walnut, Maya recessed pull handle

LOTOS

MODELS

What does the lotus evoke in you? We see nobility, which we have tried to translate into a clean, refined design combining wood and metal. The manually inserted silver or black strip elevates these doors to a striking interior element.

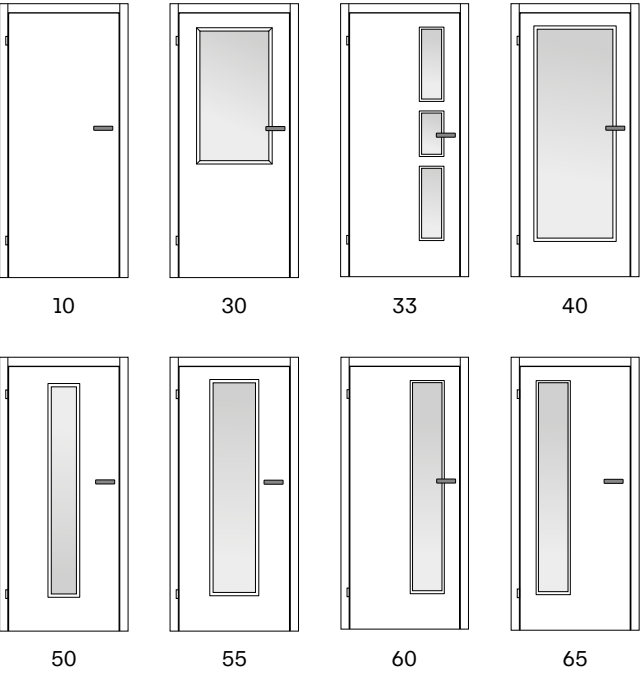

SAPELI | Interior doors | LOTOS

ELEGANT 10 non-rebated door – Fragment White CPL,
mini OBTUS frame – Knotted Oak CPL, Nomad Touch handle

ELEGANT®

MODELS

The name speaks for itself. Doors with a timeless design that introduce serene elegance into your interior. They don't need to draw attention to themselves; with their simple lines, they are the perfect interior element.

SAPELI | interior doors | ELEGANT

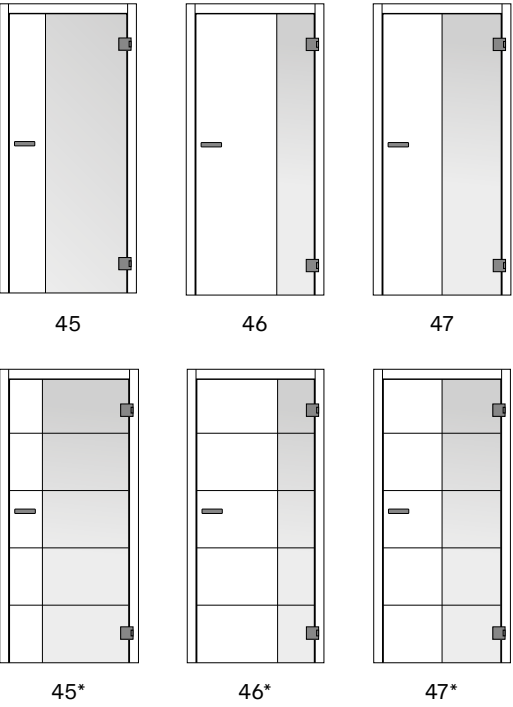

MODENA 45 door – Beam Spruce veneer, Dark Oak oil,
Planibel Bronze glass, NORMAL frame – Beam Spruce veneer,
Dark Oak oil, Yes 610 handle

MODENA®

MODELS

Two premium materials, wood and glass, combined to create a sense of lightness. Add frame glazing, a minimalist, non-rebated edge, and confidently visible hinges, and you have the Ferrari of doors.

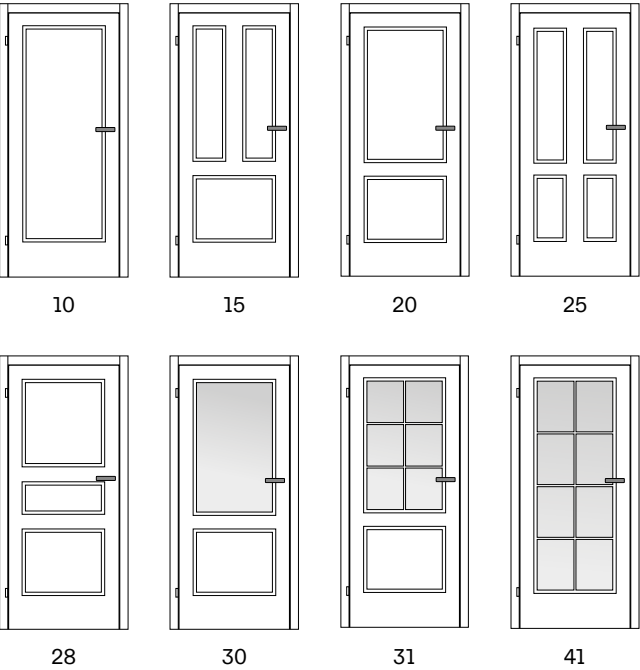

SAPELI | interior doors | MODENA

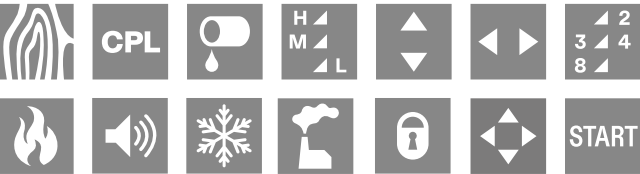

BERGAMO 10 door – Premium RAL 1013,
NORMAL frame – Premium RAL 1013, Andy handle

BERGAMO

MODELS

A traditional look that enhances any interior. BERGAMO doors are a classic, perfect for a country-style kitchen or a modern nursery. Choose from a wide range of finishes, with a double-leaf version also available.

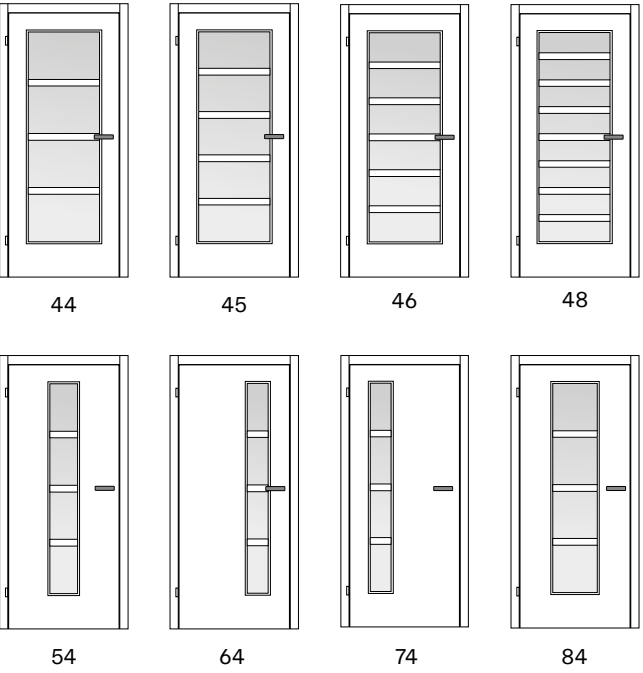

SAPELI | interior doors | BERGAMO

MERA 45 door – Natural Halifax Oak CPL,
Satinato Grey glass, OBTUS frame – Natural Halifax Oak CPL,
Torres handle

MERA®

MODELS

Functionalism brought practicality and perfection to Czech interwar architecture. This is the inspiration behind the creation of MERA doors. With their simple glazing and delicate frame, they are a perfect fit for both modern and classic interiors.

SAPELI | interior doors | MERA

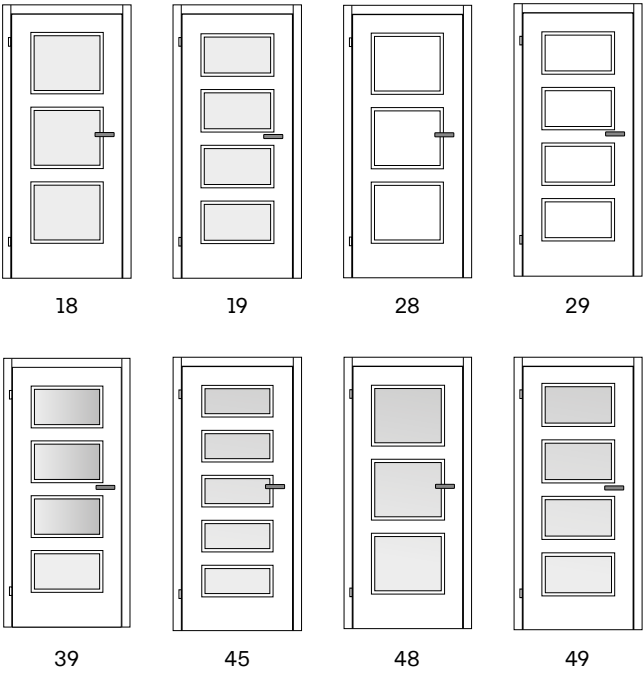

SWING 49 door – Smoke Oak CPL, Satinato White glass,
NORMAL frame – Smoke Oak CPL, Kvadra handle

NEW DECOR

SWING

MODELS

Good design never gets old. Just like jazz and swing, which these doors reference both in name and design, reminiscent of the refined taste of the First Republic era. The rectangular cutout visually elongates the space, adding a sense of lightness and freedom. Much like SWING does to your mood.

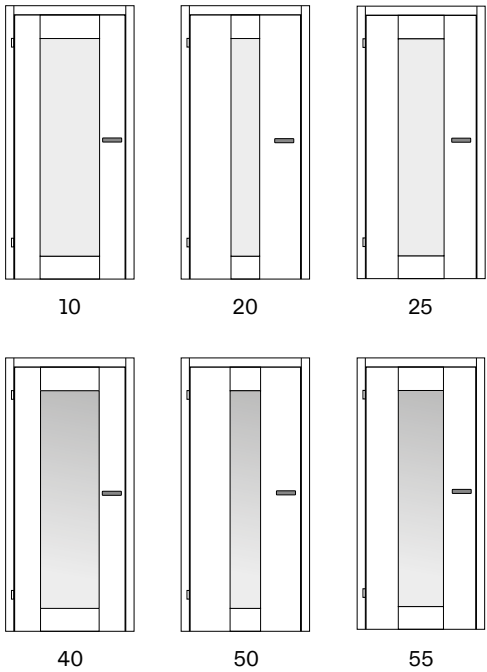

SAPELI | interior doors | SWING

TALIA 40 non-rebated door – Scandinavian Oak CPL,
Satinato Prodelux glass, OBTUS frame – Scandinavian Oak CPL,
Minimal handle

TALIA®

MODELS

Nordic, straightforward, and understated, TALIA doors enhance Scandinavian-style interiors with their subtle minimalism, while also complementing classic settings perfectly. We offer them in popular white as well as all RAL and NCS shades.

SAPELI | interior doors | TALIA

Fully glazed doors bring light and airiness into the interior. With patterned glass, you can also invite playfulness into your home. A frosted, matte, or tinted version can ensure plenty of privacy.

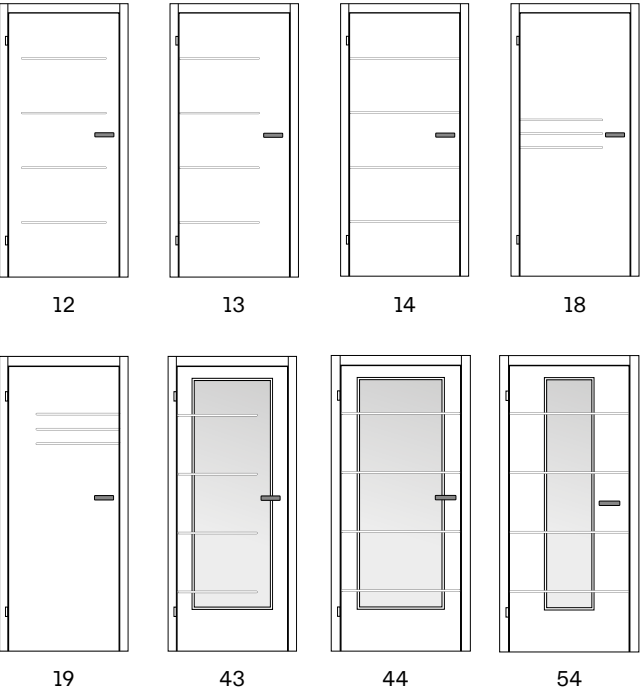

SAPGLASS | interior doors | SAPGLASS

NOTE 14 non-rebated door – White Premium,
mini OBTUS frame – White Premium, Up handle

NOTE®

MODELS

NOTE doors embody the joy of life and music. Subtle grooved lines evoke a musical stave, a design that can also grace glazed and fully glazed doors from the SAPGLASS collection. What notes will you use to compose your interior?

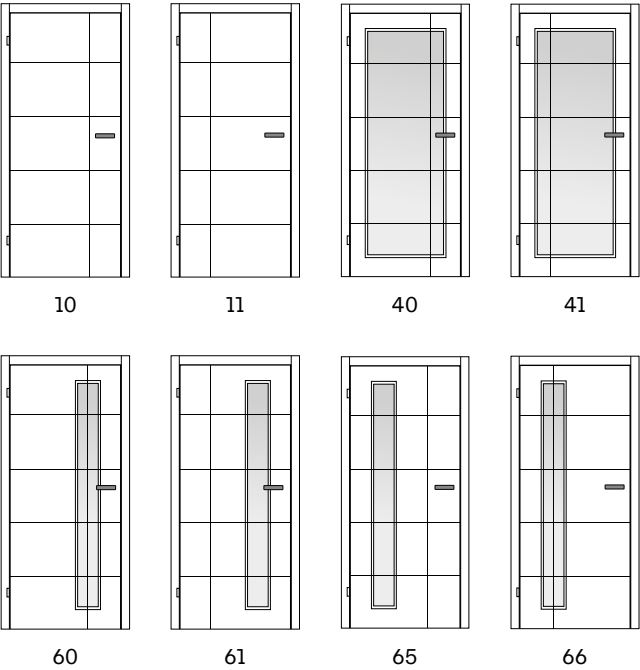

SAPELI | interior doors | NOTE

REDE 11 wall-mounted sliding door – Oak Natur veneer with black grooves, Entry recessed pull handle, and MINIMA sliding system

REDE®

MODELS

Geometry in your interior? Absolutely! REDE doors bring a touch of sophisticated modernity to any space, evoking a sense of balance and order. With their clean lines, they're available in natural veneers, paint, or even incorporated into glass elements and fully glazed doors from the SAPGLASS collection.

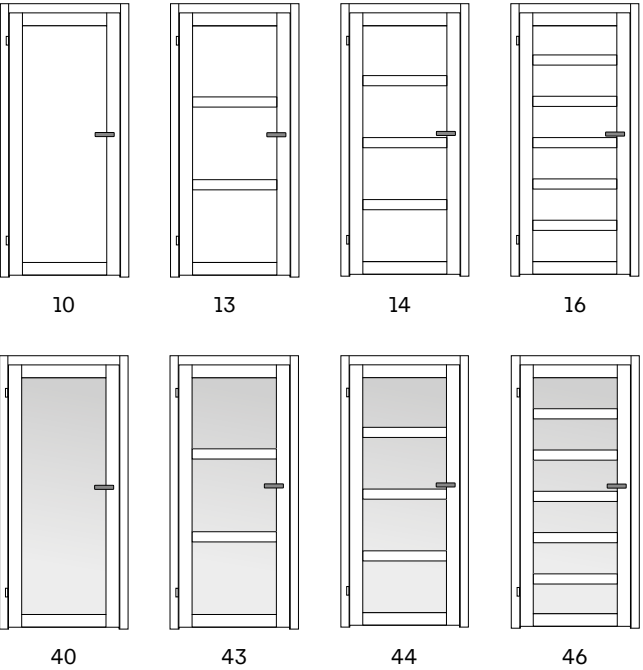

SAPGLASS | interior doors | REDE

KUBIKA 13 reverse door – American Walnut veneer,
OBTUS frame – American Walnut veneer, Entry handle

KUBIKA

MODELS

We've drawn on the charm of Czech Cubism to design doors that introduce striking lines and understated elegance into your home. Their minimalist aesthetic complements a wide range of interiors, whether you opt for natural veneer or paint.

SAPELI | interior doors | KUBIKA

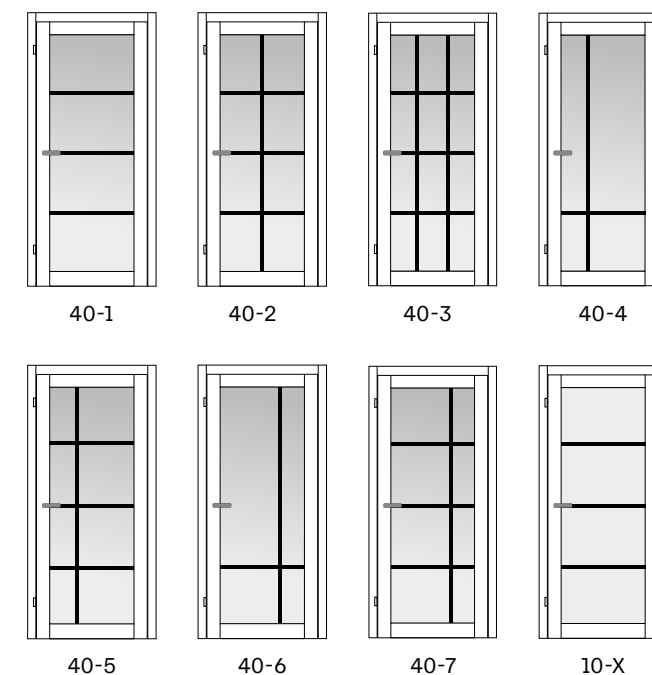

KUBIKA INDUSTRIAL
40-2 non-rebated door,
Premium RAL 9005, Float Clear
glass, SAP 911 concealed
aluminium frame, Industry
Squelette handle

KUBIKA INDUSTRIAL

MODELS

Designed with industrial spaces in mind, these doors feature a subtle frame construction that highlights their loft-inspired character. Choose from classic industrial black or pure white, or explore the striking appeal of gridded detailing on natural-veneer doors.

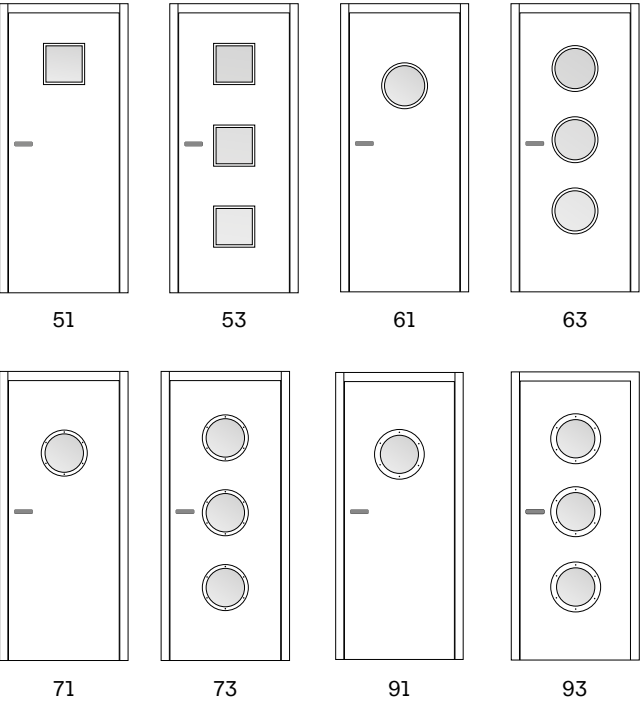

SAPÉLI | interior doors | KUBIKA INDUSTRIAL

METRIC 71 non-rebated door – White Arctic Oak CPL,
Satinato White glass and grey strip, NORMAL frame – White Arctic
Oak CPL, Lusy handle

NEW

METRIC®

MODELS

Who says a universal door model has to be dull? With square or circular glazing, METRIC doors bring a touch of symmetrical charm while letting in much-needed light. Available in natural wood veneer, durable CPL laminate, or a wide palette of paints, they're the perfect fit for any interior style.

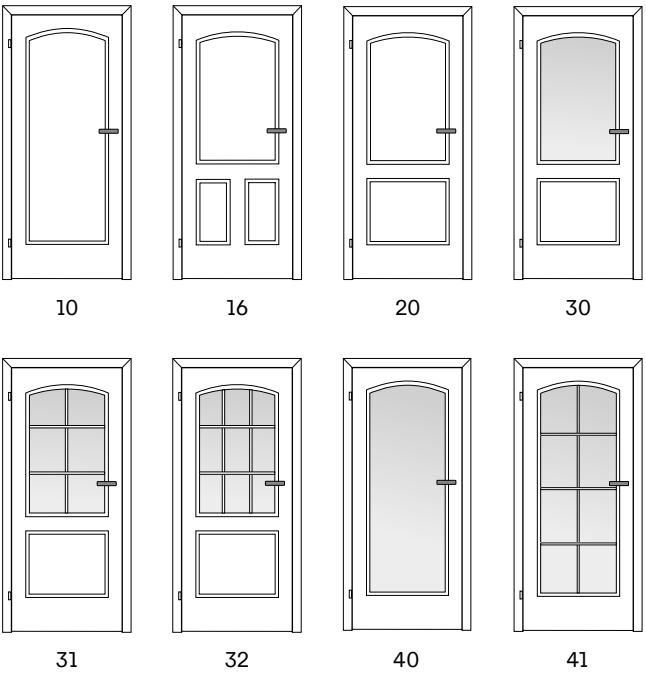

SAPELI | interior doors | METRIC

VENECIA 31 door – Oak CPL, Bark Clear glass,
 NORMAL frame – Oak CPL, Twister handle

VENECIA®

MODELS

A classic that never loses its charm, much like a stroll along the Venetian canals, where history whispers at every turn. Soft curves and moulding give the doors a familiar look refined over centuries. The VENECIA doors are available in a wide range of finishes and colours.

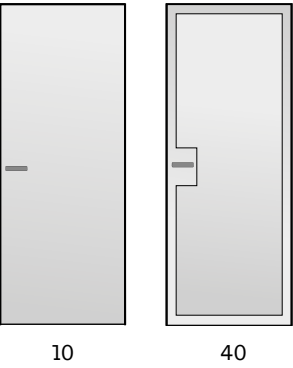

SAPELI | Interior doors | VENECIA

MAXIM 10 non-rebated door,
Diamond Clear glass – RAL 7030,
SAP 911 concealed aluminium frame,
Minimal handle

MAXIM

MODELS

SAPOLI | interior doors | MAXIM

Glass and aluminium. Nothing more.
A distinctive combination, perfect in its simplicity.
The aluminium frame makes the doors lightweight
yet durable, while the cladding of high-quality
lacquered glass lends them a modern and delicate
appearance, precisely in the colour scheme
your interior requires.

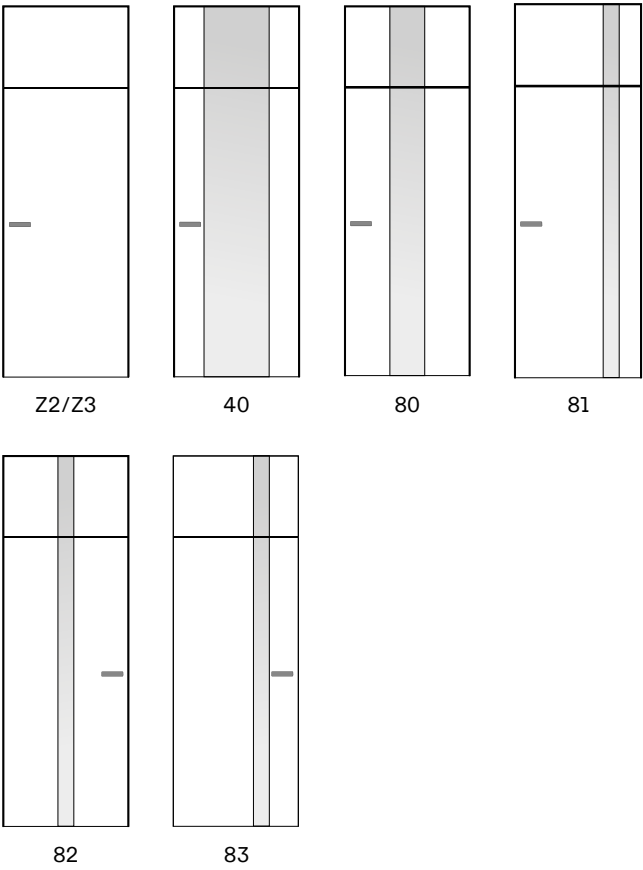

GLATT - ELEGANT
10 reverse door with transom
– Natura Oak CPL, OBTUS Z2
frame – Natura Oak CPL,
Lusy handle

NEW DECOR

GLATT

MODELS

GLATT and GLATT HARMONIE series

Truly tall doors. Reaching up to the ceiling. The transom gently fills the space between the door and the ceiling, making the room feel airier and larger. In the glazed version, it brings light into darker rooms.

SAPELI | interior doors | GLATT

Glass walls and partitions

Let there be light! How to divide a space without visually shrinking it? Glass walls can solve this dilemma. With glass, light, clarity, and elegance enter the interior. The safety-tempered glass we produce in-house stands out for its high strength, impact and scratch resistance, and ease of maintenance.

- over 20 types of glass – clear, frosted, patterned, tinted
- custom ceramic printing of patterns, sandblasting, engraving
- hinged, sliding, pivoting
- positive and negative patterns

SAPELI | glass walls and partitions

NORMAL frame casing – Knotted Oak CPL, Float Clear glass and G128 engraving,
Arcos hardware

SAPELI | glass walls and partitions | FUTRA

FUTRA

MODELS

Traditional glass wall solutions with casing or framed door frames, perfect for combining with any type of interior door. Fire protection is a given, along with a wide range of glass finishes. For easy maintenance and increased durability, we recommend Satinato White Antiscratch. If you're looking for a subtle level of transparency, choose Satinato Prodelux. One of the key advantages of FUTRA design walls is undoubtedly their easy installation.

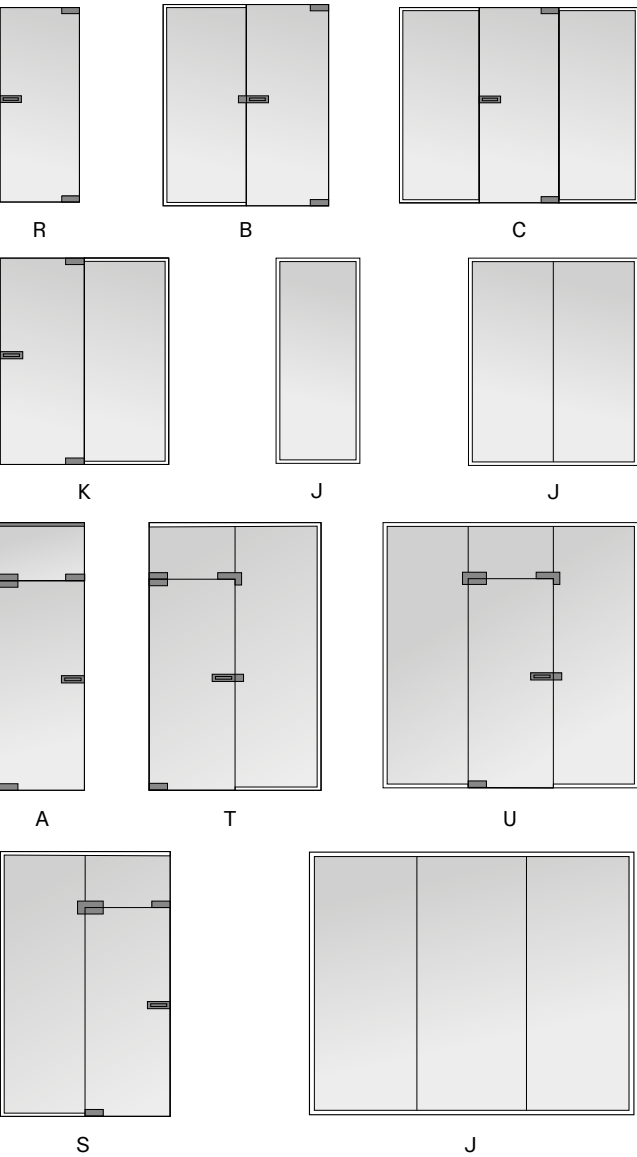

Model U wall, **SAPGLASS** pivoting door,
Float Clear glass, HK 400 handle,

MOON

MODELS

Weightlessness itself, as if gravity didn't exist. This is the sensation created by glass partitions with aluminium profiles, which can be combined with various types of opening mechanisms and door frames. The MOON SWING variant, with hinged or pivoting doors, blends the glass surface with wooden elements, whether fully wooden doors or just a subtle wooden frame. MOON SLIDE further enhances this harmony with a sliding opening mechanism, allowing you to make the most of every inch of surrounding space. As standard, it features a modern compact hardware system with a soft-close mechanism.

ZEN

ZEN I acoustic glass wall, Float Clear glass, OBTUS structure and framed door frame – Oak Natur veneer, Clear oil, ELEGANT 10 wood – Oak Natur veneer, Clear oil, Lusy handle

NEW

SAPELI | glass walls and partitions | ZEN

The acoustic glass-and-wood partitions perfectly combine minimalist design with high sound insulation of up to 44 dB. ZEN is ideal for those who need to escape the hustle and bustle of the outside world and retreat into their own peaceful microcosm. It's the perfect solution for creating oases of calm in noisy open-plan offices or other commercial spaces, but it also suits home offices and households in today's world.

Security doors for flats

SAPELI entrance doors offer the perfect blend of aesthetics and security. They welcome both you and your guests with warmth, while also protecting your home. Thanks to a combination of special features, they can be fire-resistant, smoke-tight, and soundproof at the same time. The reinforced frame makes our entrance doors extra durable, and you can match them with both your interior and exterior by choosing different finishes for the outer and inner sides.

- 3 model series
- possibility of different finishes/models on the exterior and interior sides
- fire resistance of up to 45 minutes
- high security level in class RC3
- modern access technologies

SAPELI | security doors for flats

Special features for security doors to flats:

Fire-resistant treatment – EI/EW30 and EI/EW45

These doors prevent the spread of fire and protect the flat for a certain period.

Sound insulation – Rw 32 – 43 dB

The specially designed door structure, along with sound-insulating elements, effectively dampens noise from communal areas.

Climate treatment – climate II and III

An additional climate layer within the door structure protects it from deformation caused by various climate conditions.

Smoke-tight treatment – S_a / S₂₀₀

Smoke can often be more dangerous than fire itself, so it is advisable to complement these doors with a treatment that limits smoke penetration.

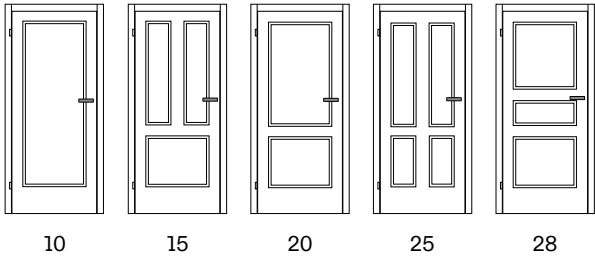

Security treatment – RC2 and RC3

To secure your flat or other spaces against forced entry, opt for security doors.

Models

TENGA

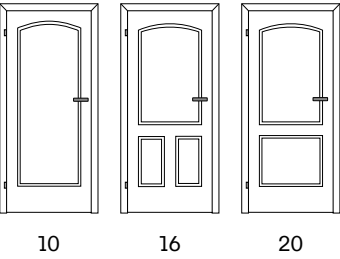

ELEGANT

SWING

VENECIA

 Fire-resistant and security doors must be supplied with the corresponding frame, and their installation can only be carried out by an installer trained and authorised by the company.

ARGOS RC2 security door in the ELEGANT 10 finish – Black Graphite U961 CPL, SAP 895 frame – RAL 7021, 30-minute fire resistance, RC2 safety class, 32 dB sound insulation, climate resistance II, 05 security hardware, peephole

ARGOS

The security benchmark. The perfect balance of price and performance is embodied in our baseline model of entrance doors with a 40 mm thick leaf. ARGOS doors are available in both rebated and non-rebated variants, with both standard and high resistance options. Fire flames are stopped for up to 30 minutes, while noisy neighbours returning from a party are muted by up to 32 dB.

SAPELI | security doors for flats | ARGOS

GOLIAS RC3 door in a TENGA 10 finish – Beam Oak veneer, Super White oil, SAP 871 frame – RAL 7021, 30-minute fire resistance, safety class RC3, 43 dB sound insulation, climate resistance III, M09 security hardware, Eques VEIU S31 digital peephole

GOLIAS®

TIP Enhance the GOLIAS door with a smart electromechanical lock controlled by a fingerprint or smartphone.

Doors that command respect. With two rebates and an exceptional door leaf thickness of 68 mm, they offer not only 30 minutes of fire protection, but also unbeatable sound insulation of 43 dB. And although this spruce giant is truly massive, its smooth handling is made effortless thanks to high-quality fittings.

SAPELI | security doors for flats | GOLIAS

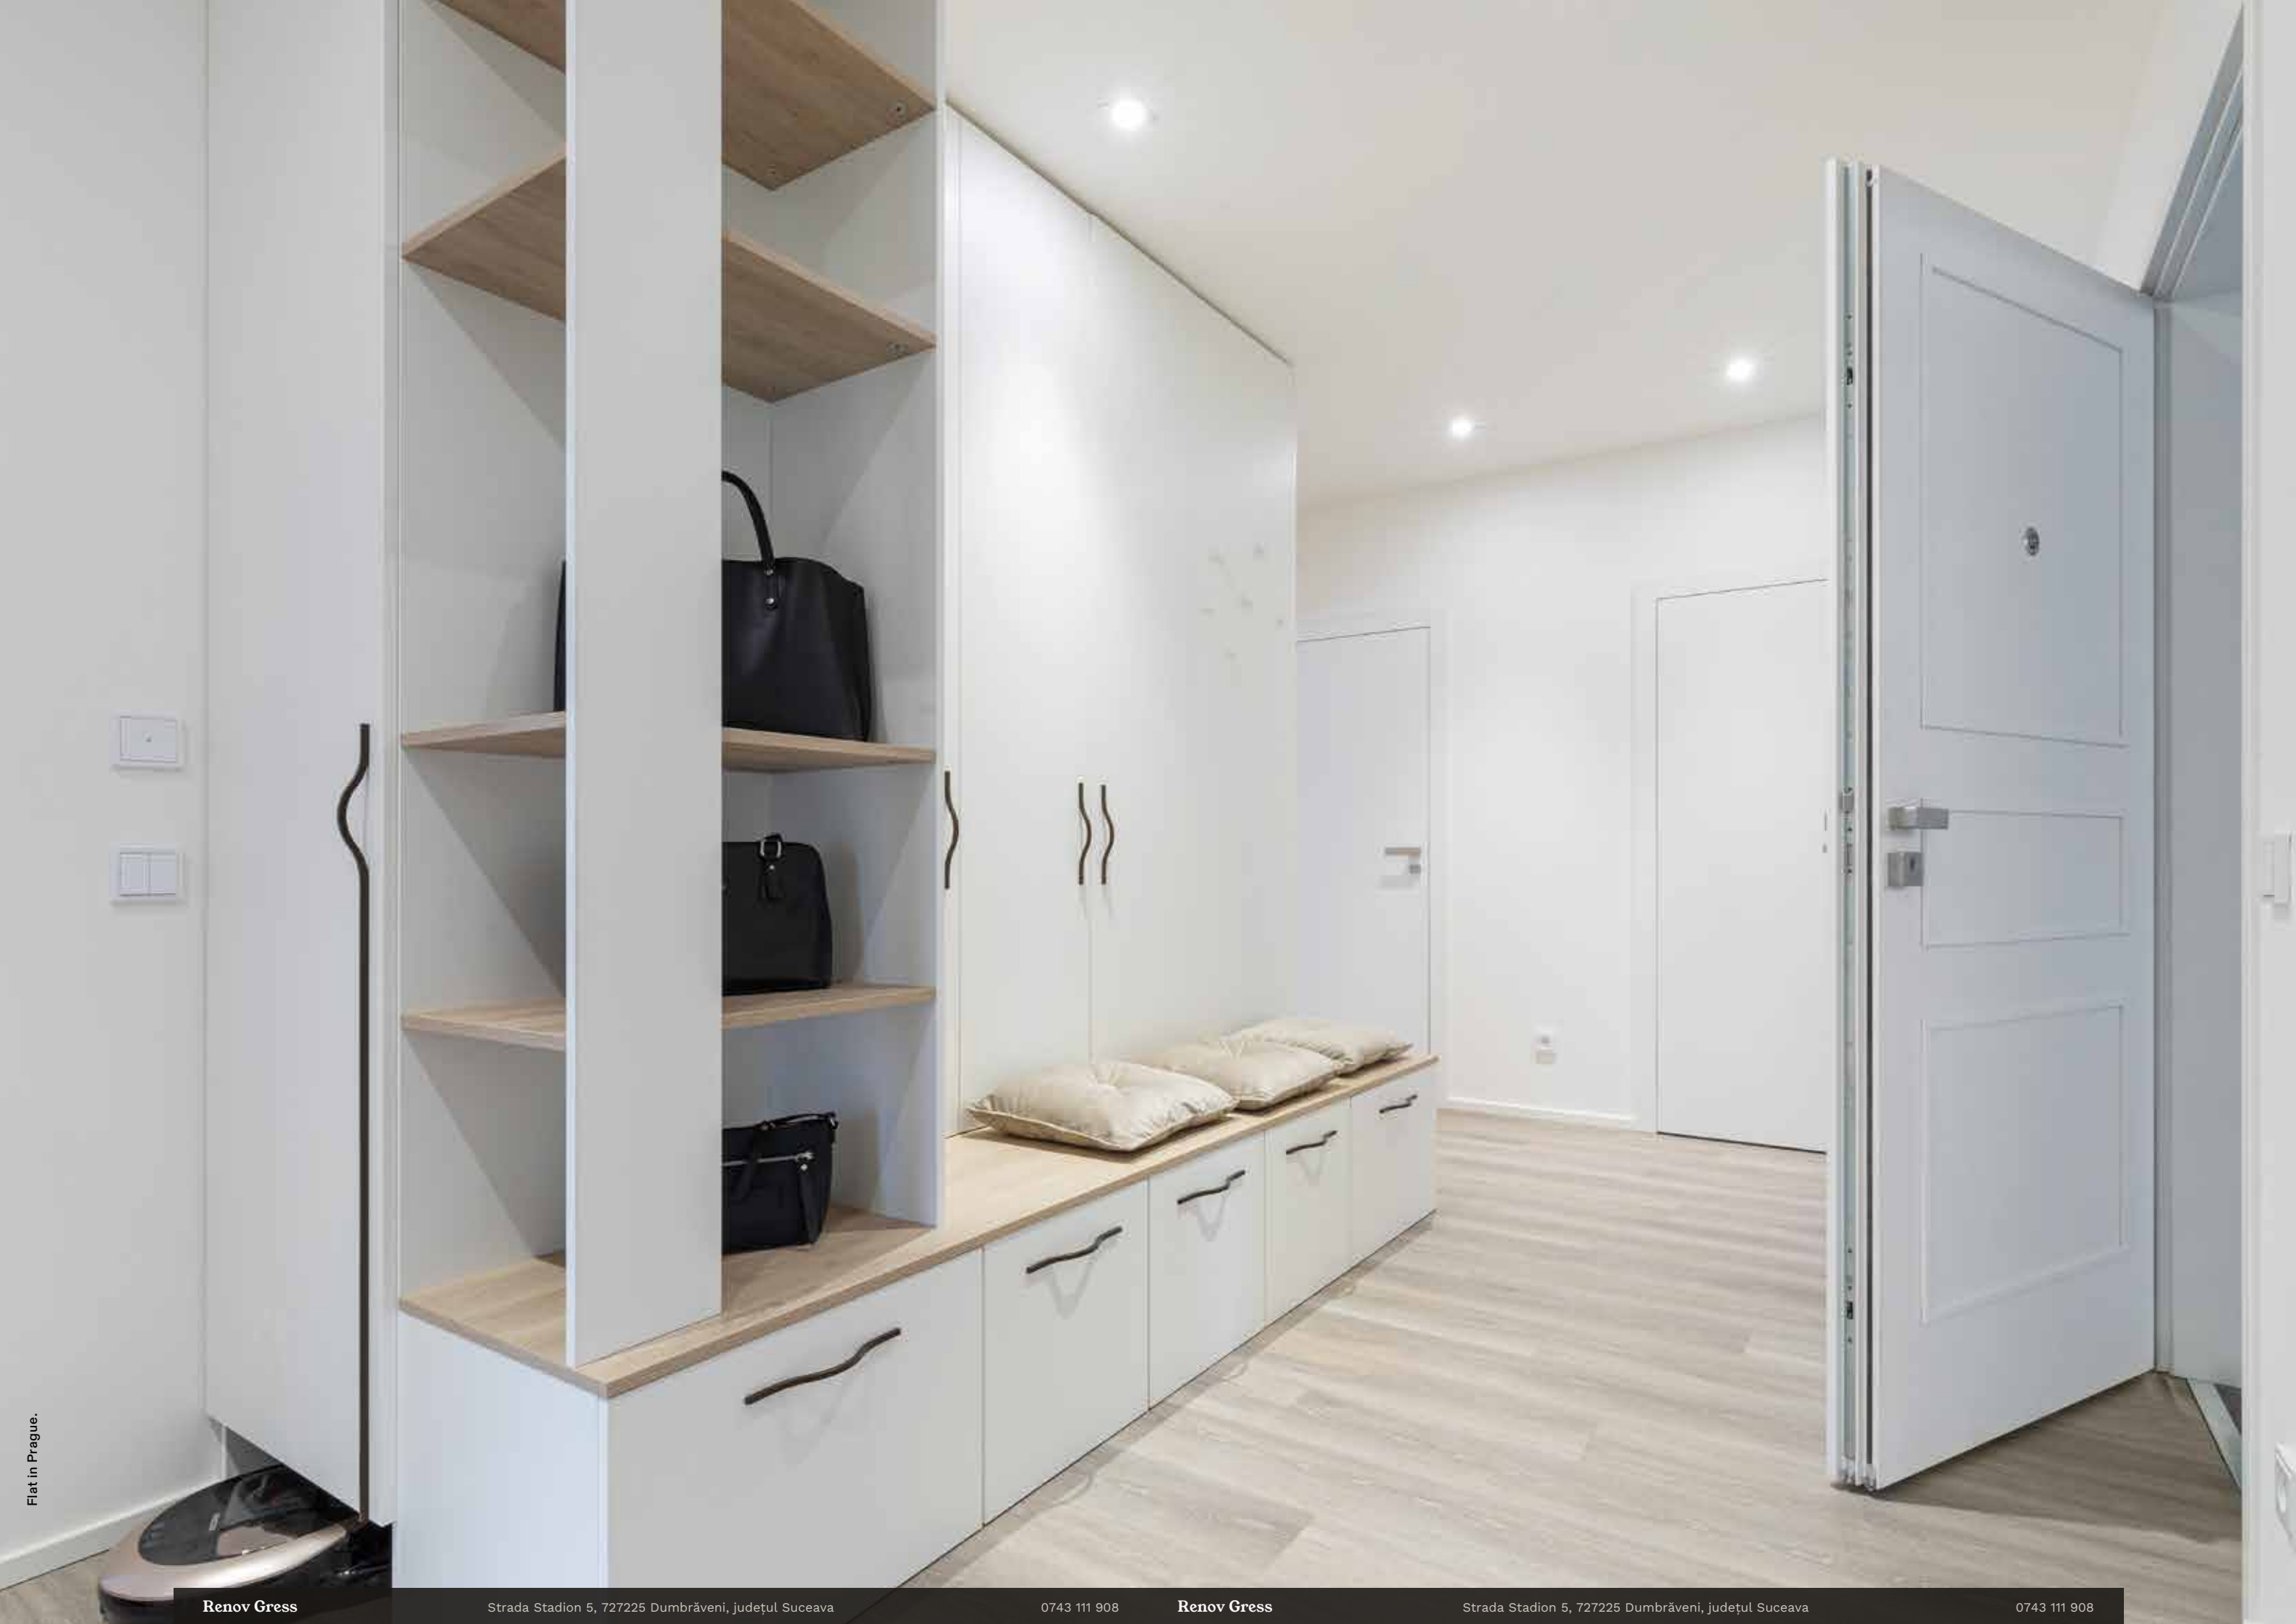

SECURO RC3 security door in an ELEGANT 10 finish
– Metal Rust HPL,
SAP 894 frame – RAL 7021,

37 dB sound Insulation,
climate resistance III,
security hardware 16,
digital peephole
Eques VEIU Pro

SECURO

A guardian for the demanding Top-of-the-line durable architectural hardware, a concealed automatic closer, and a height reaching up to 2.5 metres? SECURO offers all this, with fire resistance exceeding 45 minutes, the highest safety class, and sound insulation of 37 dB. A major advantage is the option of “dry installation”, which, thanks to anchor screws and expanding foam, reduces both installation time and effort.

SAPELI | security doors for flats | SECURO

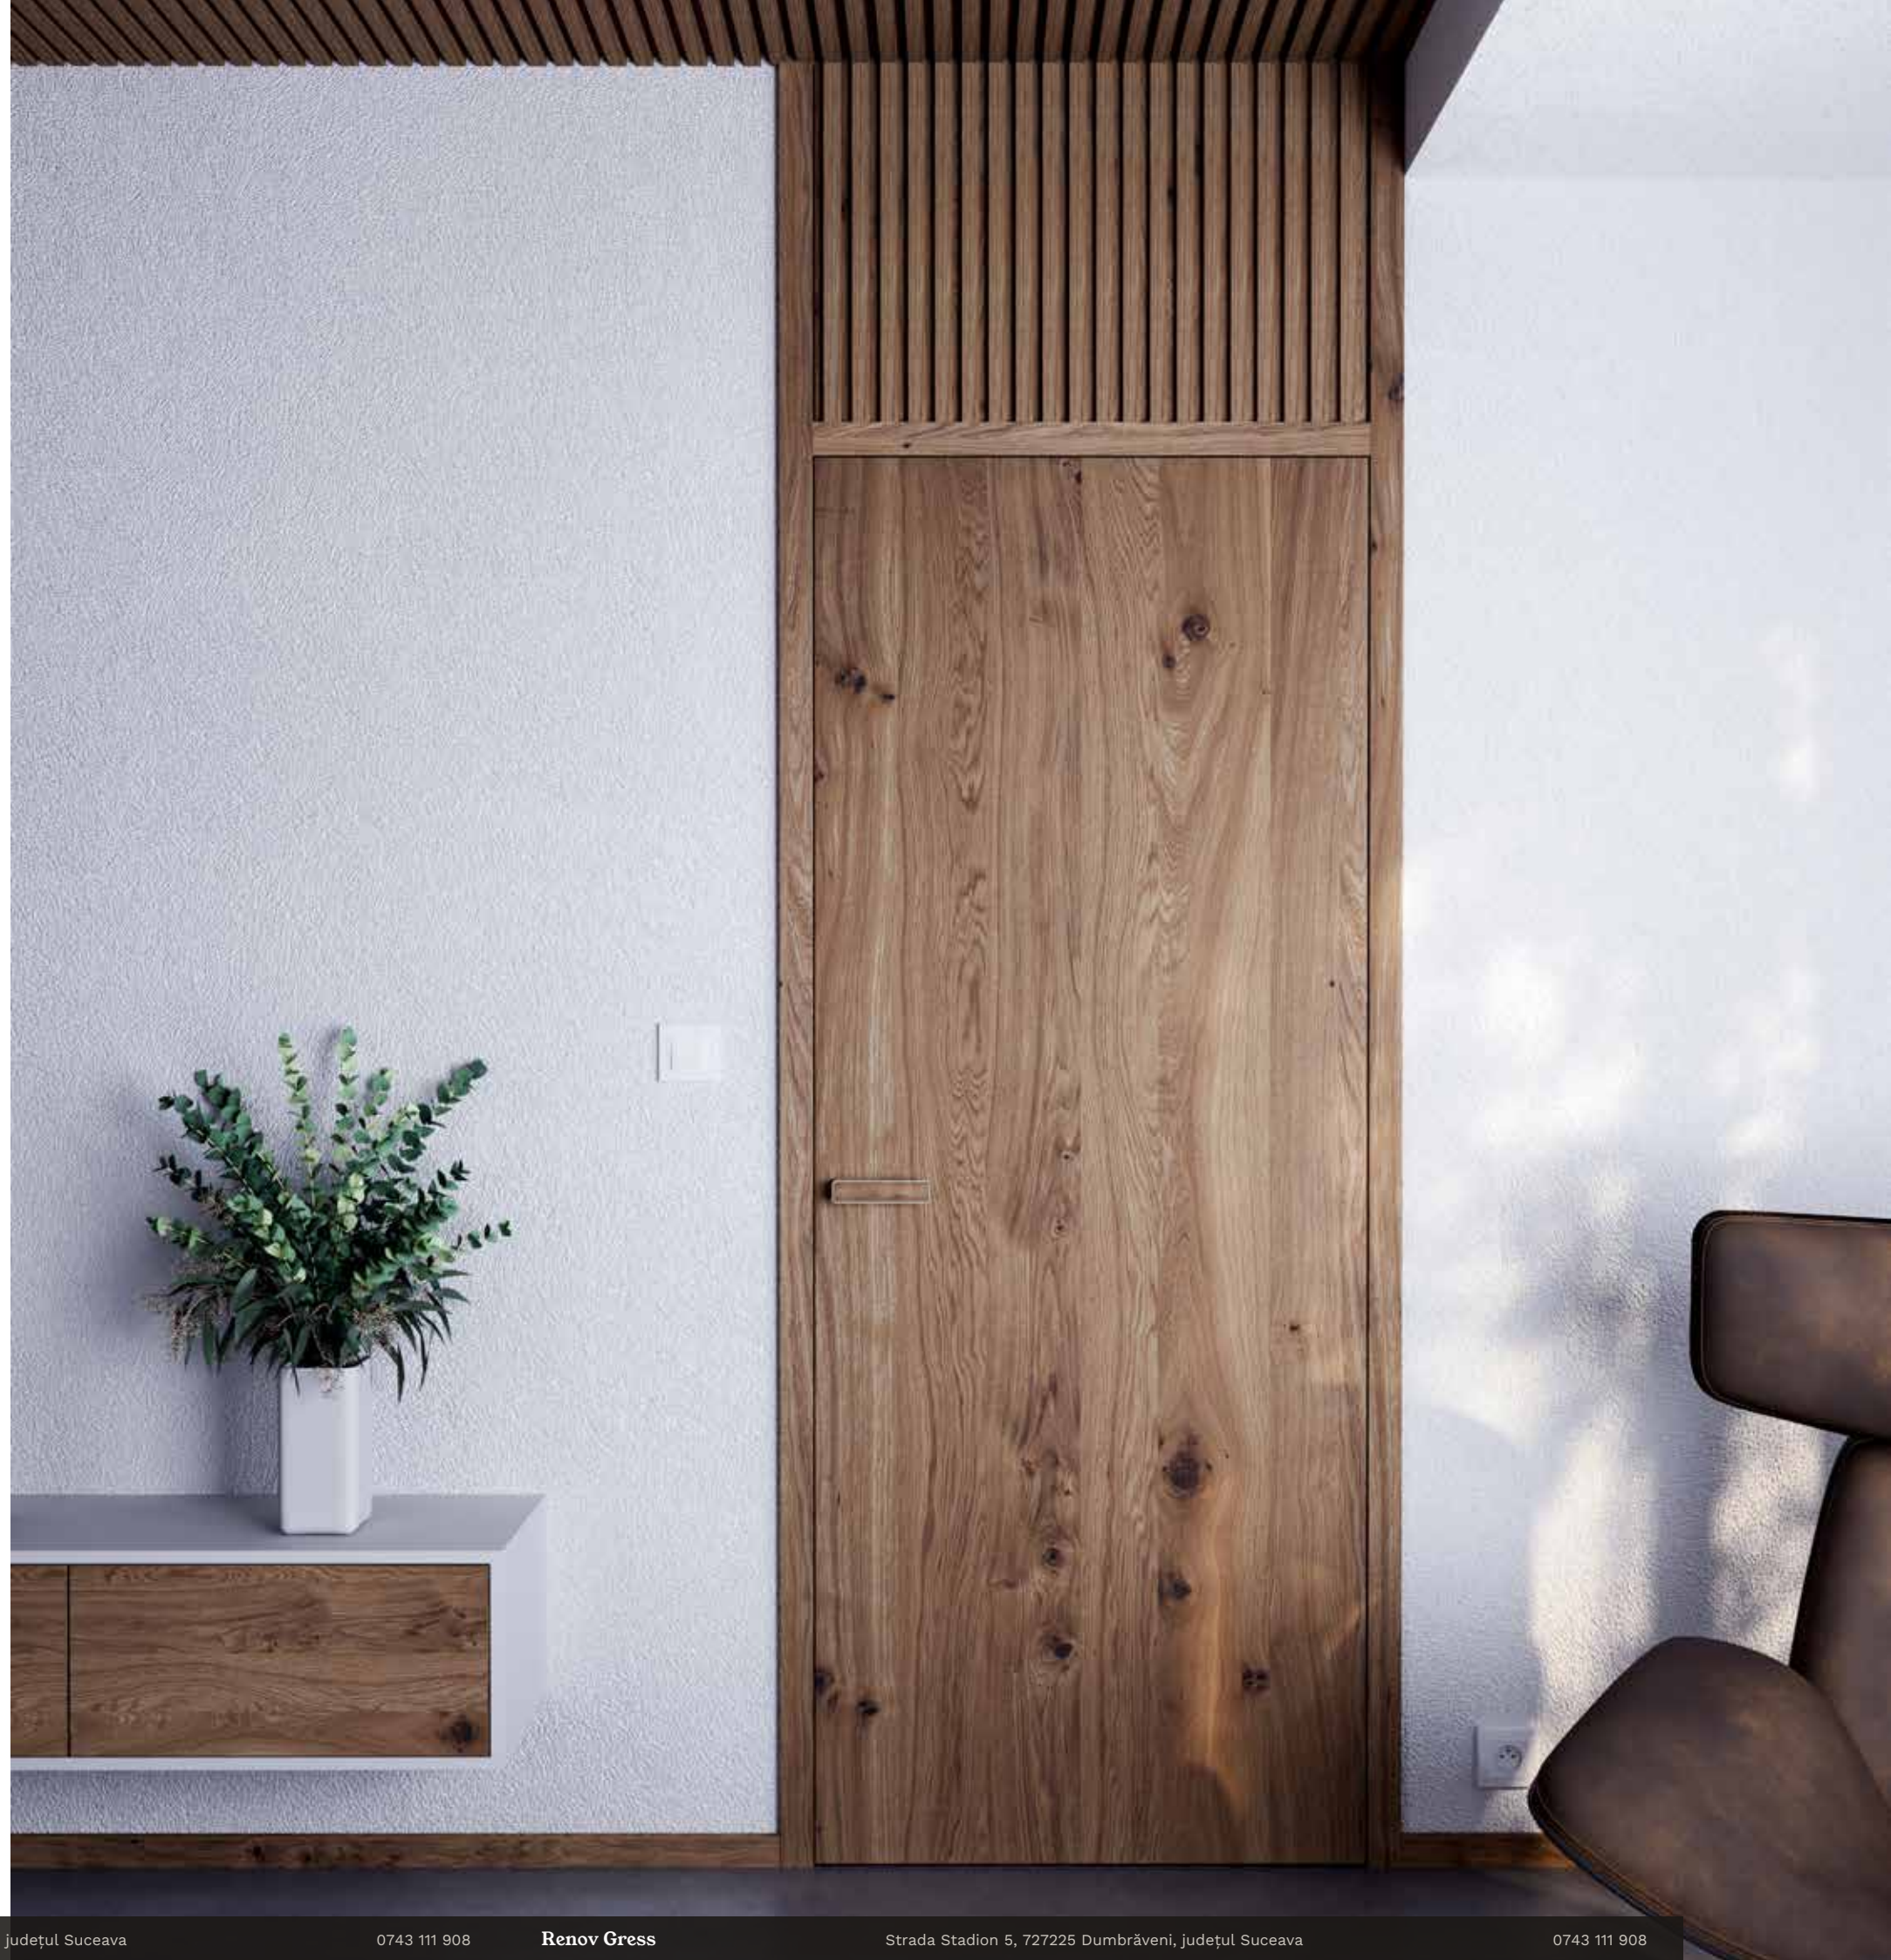

Atypical solutions

For those whose imagination can't be satisfied by any catalogue. For unconventional spaces where standard doors are not the answer. At SAPELI, we are not afraid of unconventional ideas or design challenges. We are here to help you find the best solution together.

- doors up to 272 cm high
- Single-leaf doors up to 120 cm wide
- double-leaf doors up to 240 cm wide
- angled doors, doors up to the ceiling, handle-less
- exclusive finishes

SAPELI | atypical solutions

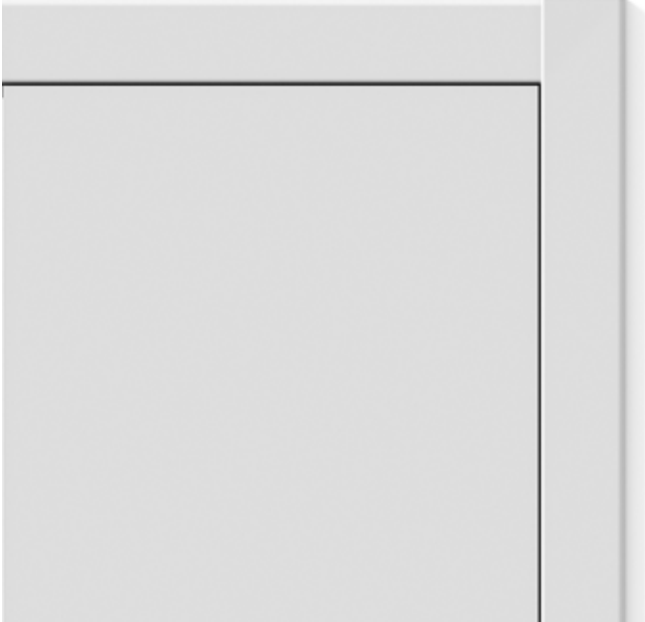

Frames

Just as a picture frame enhances a painting, door frames crown the doors within an interior. They can stand out visually in their relief, or you can choose to completely conceal the frames and seamlessly integrate the doors into the wall. If you'd like to highlight the frames but keep the wall, frame, and door in one smooth plane, we can achieve that too.

NORMAL
Classic corner joint of the frame at a 45° angle.

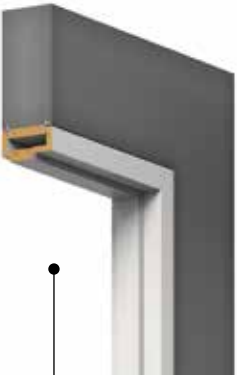

OBTUS
Modern frame corner joint, known as a “butted joint”.

Casing frame
A traditional casing frame solution for all types of door openings, including wall-mounted and pocket sliding doors. You can choose either rebated or non-rebated doors, with options for NORMAL or OBTUS finishes.

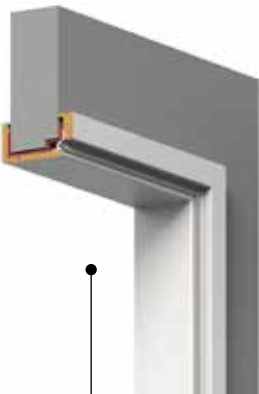

HARMONIE casing frame
The HARMONIE casing frame differs from the classic version with its unique rounded shape.

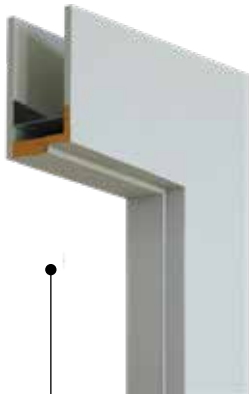

LATENTE frame
The LATENTE frame blends seamlessly into the wall thanks to a solution developed by us. The frame is in the OBTUS finish, and you can choose either rebated or non-rebated doors with options for wall-mounted or pocket sliding.

Framed frame
A framed frame is the right solution when dividing a space or a long corridor.

OKZ frame
OKZ frames work on the casing principle, making them the ideal solution for replacing old metal frames without the need for dismantling. Available in both NORMAL and OBTUS designs for rebated and fully glass doors, including wall-mounted sliding doors.

INOVIO frame
Invisible frame from our workshop. Specially structured from particleboard designed for plasterboard partitions, allowing the INOVIO frame to completely blend in with its surroundings.

Metal frame
Metal frames are used for most entrance doors. You can choose from rebated or non-rebated designs.

Concealed frame
Non-rebated doors with concealed frames blend seamlessly into the wall or can highlight their distinctive surface.

Framed frame for glass walls
A glass wall can be complemented with a wooden frame for the fitting of wooden or glass doors.

Edges

It may seem like a small detail, but the edges of a door matter. When the door is left open, the colour and finish of the edges are what stand out. The material of the edges also determines the door's resistance to impacts. Rebated versions allow the door to protrude from the frame, while non-rebated versions let the door blend naturally with the frame.

REBATED

The rebated finish is a timeless classic. The door provides good sound insulation and is not difficult to adjust. The door leaf protrudes from the frame into the room.

NON-REBATED

Modern non-rebated versions allow the door to merge seamlessly with the frame into one flat plane.

1 mm ABS edge

A resilient edge that protects against damage and matches the door's design perfectly. Available for non-rebated doors.

2 mm ABS edge

For even greater durability, opt for the 2 mm-thick ABS edge. Designed exclusively for non-rebated doors. White door options can be fitted with the advanced ABS AirFusion edge, which minimises the gap between the edge and the door surface for a seamless finish.

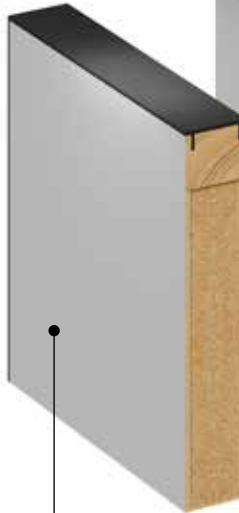

2 mm WOOD edge

A layered edge crafted for veneered doors, combining outstanding durability with impeccable style. Choose from a wide range of wood finishes, perfectly matching those offered for our doors. This edge is available exclusively for non-rebated doors.

AL edge

The robust aluminium edge doubles as a striking design feature. Compatible with rebated, non-rebated, and reverse doors.

AL black edge

A modern black aluminium edge that blends functionality, durability, and bold, standout design.

O3 edge

A universal edge for all types of doors and opening styles. The O3 sharp edge is suitable for non-rebated, rebated, and reverse doors.

P2 edge

The P2 edge, designed for rebated doors, adds a visually appealing element, offering smooth curves without a visible seam.

S2 edge | S3 edge

S2 and S3 edges are crafted for rebated doors. They feature a subtler curvature compared to the P2 edge, leaving the seam between the surface and edge visible. The advantage of the S3 edge lies in its rounded finish on both the sides and the top of the door.

Hinges

Hinges bear the full weight of the door, so we rigorously test their quality and select the ideal materials and finishes for each door type. From an aesthetic perspective, it's up to you – will you choose to showcase the hinges as a bold design feature or have them discreetly concealed?

80/10 MINI

Even a standard hinge for rebated doors can stand out, thanks to factors such as its angular design.

Justor

The Justor hinge for swing doors is built to withstand heavy use, making it ideal for demanding commercial environments.

TUKAN

Fire-rated rebated doors require special hinges, such as the three-piece TUKAN hinge.

VX 7729/120

Most non-rebated doors feature concealed hinges, but if you prefer them exposed, we've got you covered.

Exposed hinge (80/10)

Exposed hinges are typically found on classic rebated doors. They can either be subtle to blend seamlessly with the overall look of the door or stand out, e.g. in a black finish as a design statement.

Concealed hinge (SAPTEC 340)

Concealed hinges are perfect for non-rebated doors, enhancing their seamless integration with the frame. They are also a preferred choice for fully concealed frames.

Biloba

A solution for swing glass doors with a self-closing function and the option to lock the door open at a 90-degree angle.

TEG 310 2D

Opted for glass doors in a non-rebated design? A concealed hinge is a sophisticated choice.

Arcos

For glass doors in glazed walls, try the rounded Arcos hinge.

Entero

Accentuate the crystalline design of glass doors with hinges featuring sharp, clean edges.

Locks

A traditional latch lock is a tried-and-true choice you can't go wrong with. But did you know this lock can also be magnetic? When the door is open, the latch is invisible, leaving the edge perfectly smooth. With our M.A.G. 2.0 lock, you don't even need a handle – simply push or gently pull the door to open it.

Classic solution with a latch lock

A solution simple and proven over generations. If you're considering rebated doors, a classic latch lock is an obvious choice. The latch stays neatly concealed along the edge, preserving the overall look.

Modern magnetic latch lock solution

A magnetic latch lock is a sleek, modern option, perfect for non-rebated doors. The latch is concealed to maintain a smooth door edge.

The innovative Magnetic solution works entirely on the principle of magnetic forces

Traditional handles? Who needs them? With the Magnetic system, doors open effortlessly by a simply tug on the pull handle. Choose from a simple grip or a design masterpiece from the Magnetic collection.

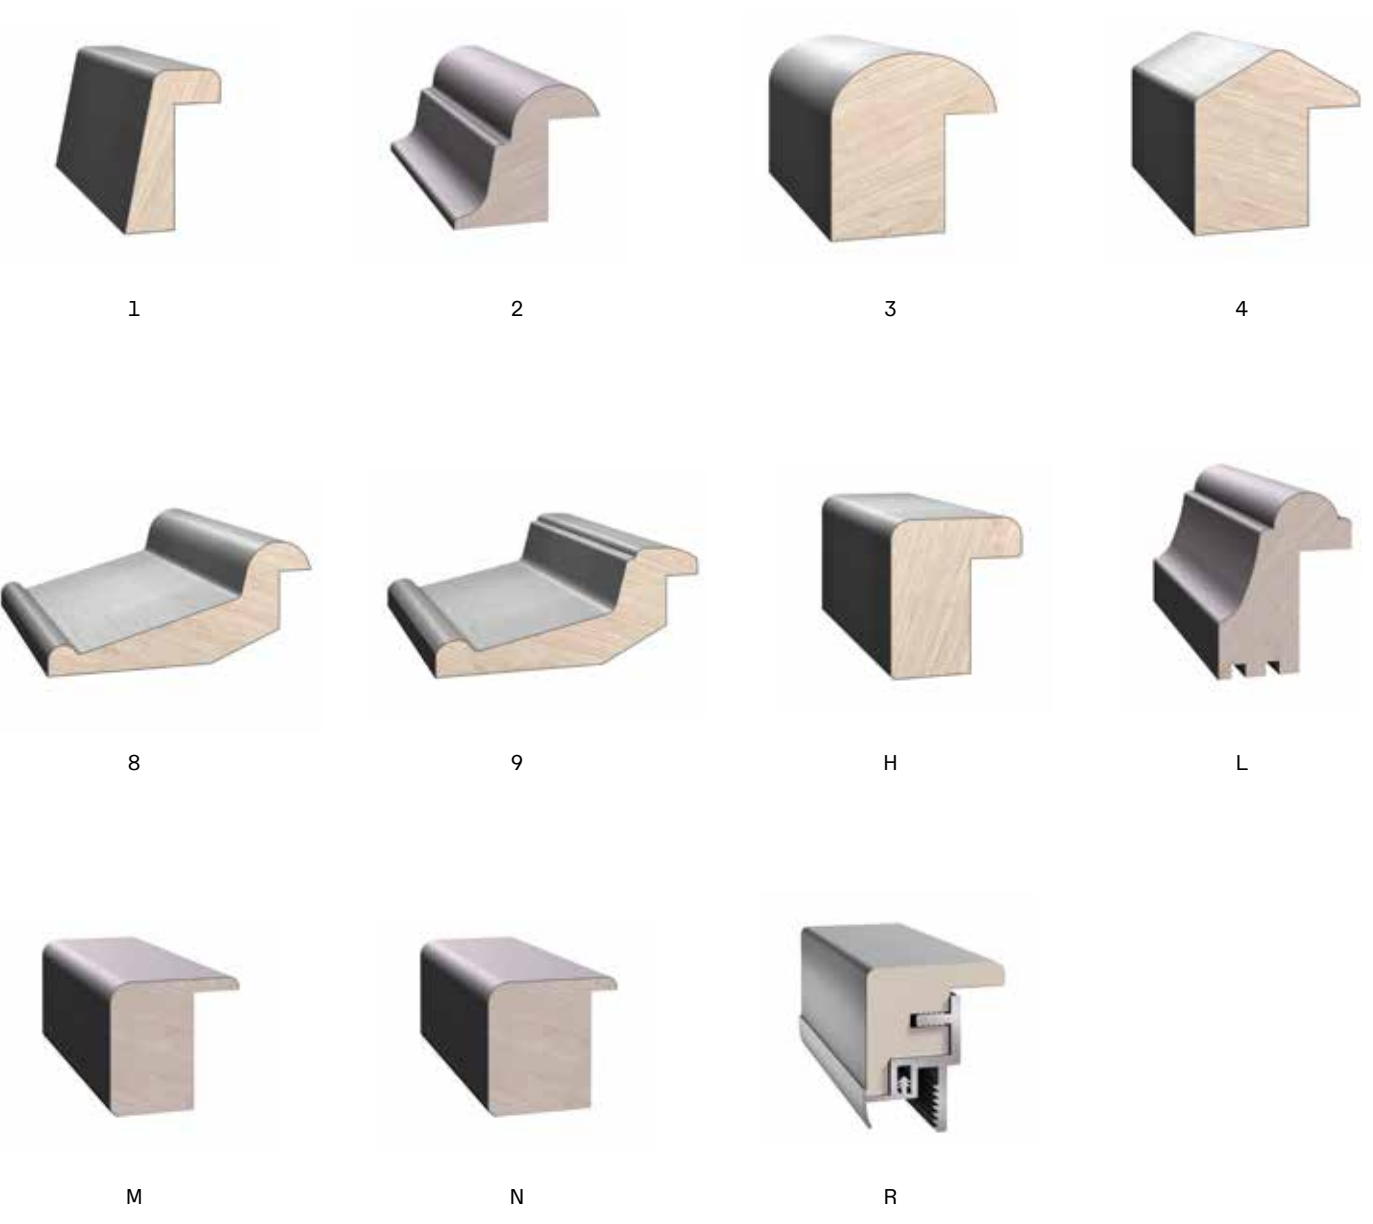

The revolutionary M.A.G. 2.0 magnetic lock, crafted by SAPELI

A lock with no visible screws for impeccably clean door edges. The stylish M.A.G. 2.0 lock, produced using 3D printing in SAPELI's workshop, comes paired with an elegant handle. The result? Quiet, smooth operation with just a pull.

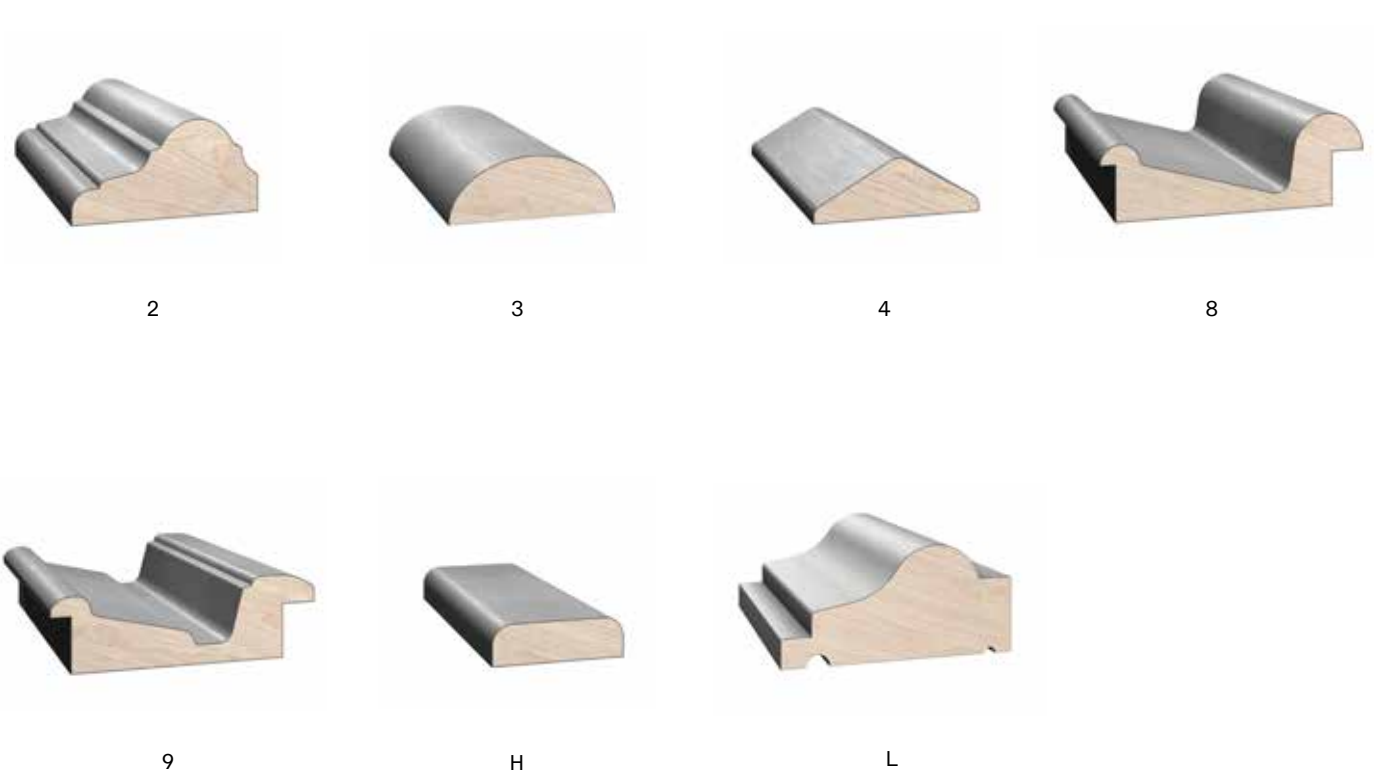

Trims

Trims can enhance and complement your door design beautifully. Glazing trims, for example, can blend seamlessly with the door surface. The options are endless, and we're up for any combination. We'll be glad to guide you through your selection.

Glazing trims

Surface trims

Glass

Modern and durable, glass brings lightness, purity, and – most importantly – brightness into your interiors. Whether it's glazed doors or full glass partitions, glass is becoming a hallmark of innovative interior design. Looking to separate your kitchen from the living room or the dressing area from the bedroom? Glass doesn't steal your light; it maintains spaciousness while offering partial or full privacy – both visually and acoustically with the right finish.

SAPELI | glass

Clear glass

Maximise your space with clear glass. It's perfect in its pure form, but can also be frosted, engraved, or customised in other ways.

Frosted and opaque glass

These options let in light while ensuring privacy. The surface can remain sleek or feature decorative patterns.

Decorative glass

Unique designs integrated directly into the glass. These options provide texture, high light transmission, and ample privacy.

Tinted glass

Glass doesn't always have to be clear or translucent. Our range includes opaque white and black glass, which pairs beautifully with industrial-style interiors.

Patterns

As soon as you choose the type of glass, you can also personalise its surface. Technologies like sandblasting, engraving, or ceramic printing allow you to introduce a variety of patterns into the interior. The same pattern can then be transferred to glazed doors, full-glass doors, and glass walls and partitions.

SAPOLI | patterns

Pattern execution

The pattern on the glass can be provided in positive, where the pattern is sandblasted (matte), or in negative, where the pattern is clear and the background is sandblasted (matte). Another interesting variant is the execution of a pattern on matte glass, such as Satinato.

Notes:

- Recommended pattern technology
- Alternative pattern technology available

Float, positive pattern

Float, negative pattern

Satinato, positive pattern

Glass decorating technology

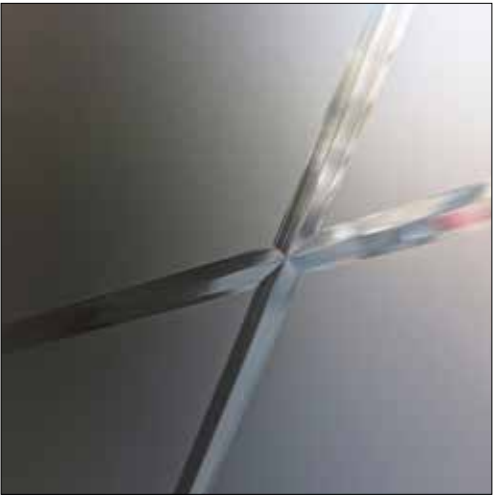

P SANDBLASTING

The pattern is sandblasted into the glass using a powerful stream of silica sand. This process works on almost all types of glass, making the surface matte. Although the most noticeable effect is achieved on float, clear glass, patterns can also be sandblasted onto coloured (Planibel) or one-sided etched (Satinato) glass without any problems.

G ENGRAVING

Engraving, or carving into glass with a diamond tool, is most effective when decorating satin-finish glass, which is made unique and original through the grinding of the etched surface. However, almost any type of glass can be engraved. Alternatively, engraving can be combined with sandblasting.

K CERAMIC PRINTING

This combines the broad possibilities of digital printing with the exceptional durability of ceramic ink, which, after tempering, literally becomes a part of the glass surface. Ceramic ink can be applied to the glass in forms such as sandblasting imitation or photographs. It is the only technology that allows you to print a different design on each side of glass doors and choose the intensity of light penetration.

Patterns

044

P G K

Harmonious combination

You'll get the perfect combination of wood and glass in the LOTOS, NOTE, and REDE model lines, where the horizontal and vertical lines of the glass doors seamlessly match the wood. You can find additional patterns in the individual model lines.

Surfaces

Emotionally, the surface of a door is the most important aspect when selecting it, as our eyes rest on it practically every day. However, choosing the surface is not only a matter of aesthetics, as the chosen material significantly affects the door's durability and how you will need to maintain it.

SAPELI | surfaces

Veneer

Veneer is a purely natural, high-quality, and unique material. Imagine a very thin sheet of wood, created by slicing or peeling tree trunks. Veneer reflects the specific tree from which it originated, with natural variations in colour and grain. The veneer surface is finished with lacquer, natural oil, or modern stains for high durability and a distinctive appearance.

Standard

Traditional, affordable woods like beech or oak, finished with a transparent UV lacquer for a pleasant matte look.

Beech (DBK)

Birch (DBR)

American Oak (DDB)

American Maple (DJA)

American Walnut (DOR)

Walnut Natur (DNO)

American Cherry (DTR)

Alder (DOL)

Comfort

Trendy materials designed for advanced surface treatments, offering a wide range of possibilities for customisation. Natural oils, modern stains, or brushed veneer. A separate category is knotty veneers, which have a very distinctive character.

Oak Natur (DND)

Ash (DJS)

Larch (DMO)

The veneer is finished with a transparent UV lacquer as standard, creating a pleasantly matte surface with a smooth texture, ideal for easy maintenance. Another option is oiling, a traditional wood treatment that gives the surface depth and makes it very pleasant to the touch.

Oak Natur Brushed (DTD)

Ash Brushed (DJD)

Larch Brushed (DMR)

Brushing the wooden veneer creates a deep texture, and when combined with an oiled finish, it further emphasises the wood grain.

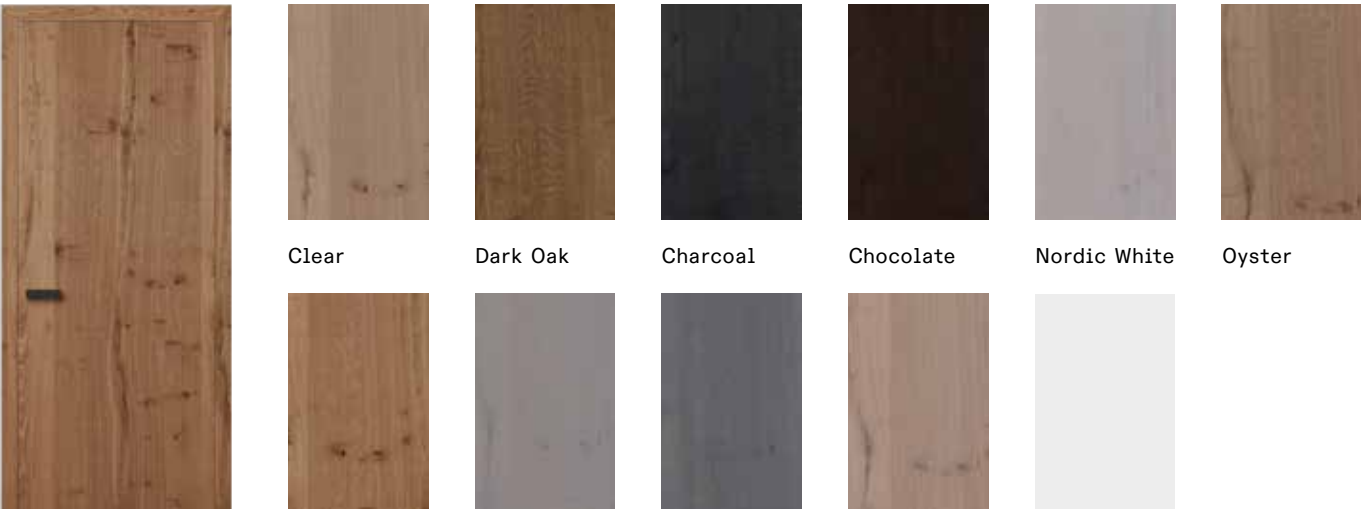

Knotted Oak (DSO)

Knotted Walnut (DSO)

Rustic knotty woods are finished with transparent UV lacquer as standard.

Premium

Luxury woods for the most discerning customers. Cut oak or rustic beam veneers are designed for distinctive interiors.

Beam Oak (DDT)

Super White

Atypical

Beam Oak Brushed (DDD)

Beam Oak Cemented (DDL)

Beam Oak is the rightful king of our range. In its basic form, with exposed knots and cracks, we finish it with oil of your choice. The veneer can be brushed on request, creating a deep texture and pronounced grain. The surface of Beam Oak can also be cemented and lacquered.

Oak Sawn (DRD)

Sawn Oak captivates with its distinctive texture, which has an extraordinarily elegant appearance. Its surface is finished with a special oil-wax.

Premium

Luxury woods for the most discerning customers. Cut oak or rustic beam veneers are designed for distinctive interiors.

Oiling

Natural oils are perfect for protecting our veneers. They create a matte, warm surface that highlights the wood’s striking grain and the beautiful scent of the oil. This traditional finish has rightfully gained popularity in recent years. We offer a variety of attractive shades, and can also create a completely custom colour. This allows you to match your new doors with the floor or furniture, ensuring a flawless interior. The oils we use are 100% natural and eco-friendly.

Brushing

Brushing veneer doors brings out the best in the wood, turning resulting in a true work of art. Brushing is a surface treatment that involves removing the softer parts of the wood’s surface. This enhances the natural grain of the wood and gives it a unique, natural, even rustic appearance. The surface also gains increased mechanical durability from this treatment. We finish it with natural oil in either Pure or Clear, or you can choose from a range of tinted oils.

Staining

We can stain natural oak veneer in a wide range of custom shades. The advantage of stained veneer is its final finish, achieved using a special acrylic lacquer with an anti-fingerprint treatment. This ensures high durability and easy maintenance of the doors.

Paint

We offer two categories of lacquer finishes, each differing in the application method. This naturally affects the price, the final visual effect, and the durability of the door’s surface.

START

The paint is applied by machine. The door edge is made of lacquered laminate, and the door frame can be chosen in either foil, laminate, or lacquered paint. START is an option offering good durability and excellent value for money. We only use white paint for this finish.

White (BUV)

Premium Paint

Both the doors and frames are coated with several layers of highly durable premium lacquer, with most of the work done by hand. The Premium Paint option satisfies even the most demanding customers seeking a flawless appearance. Plus, this paint is certified for use on children's toys, making it perfect for households with young children. We paint in white, but can also customise to any colour from the RAL and NCS colour charts.

White Smooth + RAL and NCS (BRL)

Comfort Paint

The paint is applied by machine. The door edge is manually lacquered, and we offer a precisely lacquered frame for doors. This category is especially appreciated by customers with an eye for detail. The doors have a beautiful appearance and fit perfectly into any interior. We only use white paint for this finish.

White Smooth (BUS)

CPL laminate

CPL is 0.2 mm thick continuously pressed laminate. Undoubtedly the most durable material against mechanical damage and the easiest to maintain, it can even withstand disinfectants. Thanks to its properties, CPL laminate is ideal for families with children or pets.

Standard

Laminate decors in standard colours and several wood decors.

White Smooth (CB7)

White Pearl (CBE)

White Porous (CBO)

Grey (CSE)

Grey Oak (CSU)

Oak (CD7)

Walnut (CSO)

Comfort

Trendy colours, reproductions of interesting materials, and a wide range of wood decors that are 3D structured and sourced primarily from Egger. These surfaces combine well with floors and furniture.

HPL laminate

HPL is 0.8 mm thick high-pressure laminate. It is highly resistant to mechanical damage and easy to maintain, even with disinfectants used in healthcare. Thanks to its properties, HPL laminate is suitable for high-traffic spaces such as schools, healthcare facilities, and supermarkets, but it also fits perfectly in homes.

HPL Design

A range of attractive reproductions of materials and modern laminate with a 3D structure.

Start

Do you know Start? It's an economical white material supplemented with basic wood decors, combining UV technology on the doors and foil on the frames. Its main advantage is clearly its low price.

Cardboard

Cardboard is a special surface finish that can be further treated with regular paint. Alternatively, you can cover the doors with wallpaper or apply a concrete finish. Ideal for concealed frames. Nanoverde is an exclusive surface made from 100% recycled material produced from Tetra Pak® packaging.
